

Official ResellerClub **WHMCS Modules**

What is **WHMCS**?

- ✓ WHMCS is an all-in-one client management, billing & support solution for online businesses.
- ✓ Any business with a need for online billing, particularly services or membership of a recurring nature can use this solution.
- ✓ This can operate as a stand-alone portal or can be integrated into an existing website.
- ✓ Get seamless integration of Payment Gateways, APIs, Domain Registrars, etc.

Feature List

- ✓ Supports multiple Currencies and Languages
- ✓ Integrated Support System
- ✓ To-dos, Notes and Invoicing with PDF attachments
- ✓ Recurring Billing
- ✓ Social Media Integration
- ✓ Profit Calculator
- ✓ Plug-in Support
- ✓ Great Reporting Tools
- ✓ Send Quotations

Partnership Offerings

- ✓ MaxMind Fraud Protection Credits
- ✓ McAfee PCI Compliance Service
- ✓ Built-in support for PayPal & 2Checkout
- ✓ ResellerClub Domain Reseller Account
- ✓ Quantum Gateway
- ✓ DemoWolf Flash tutorials
- ✓ Tools for Developers

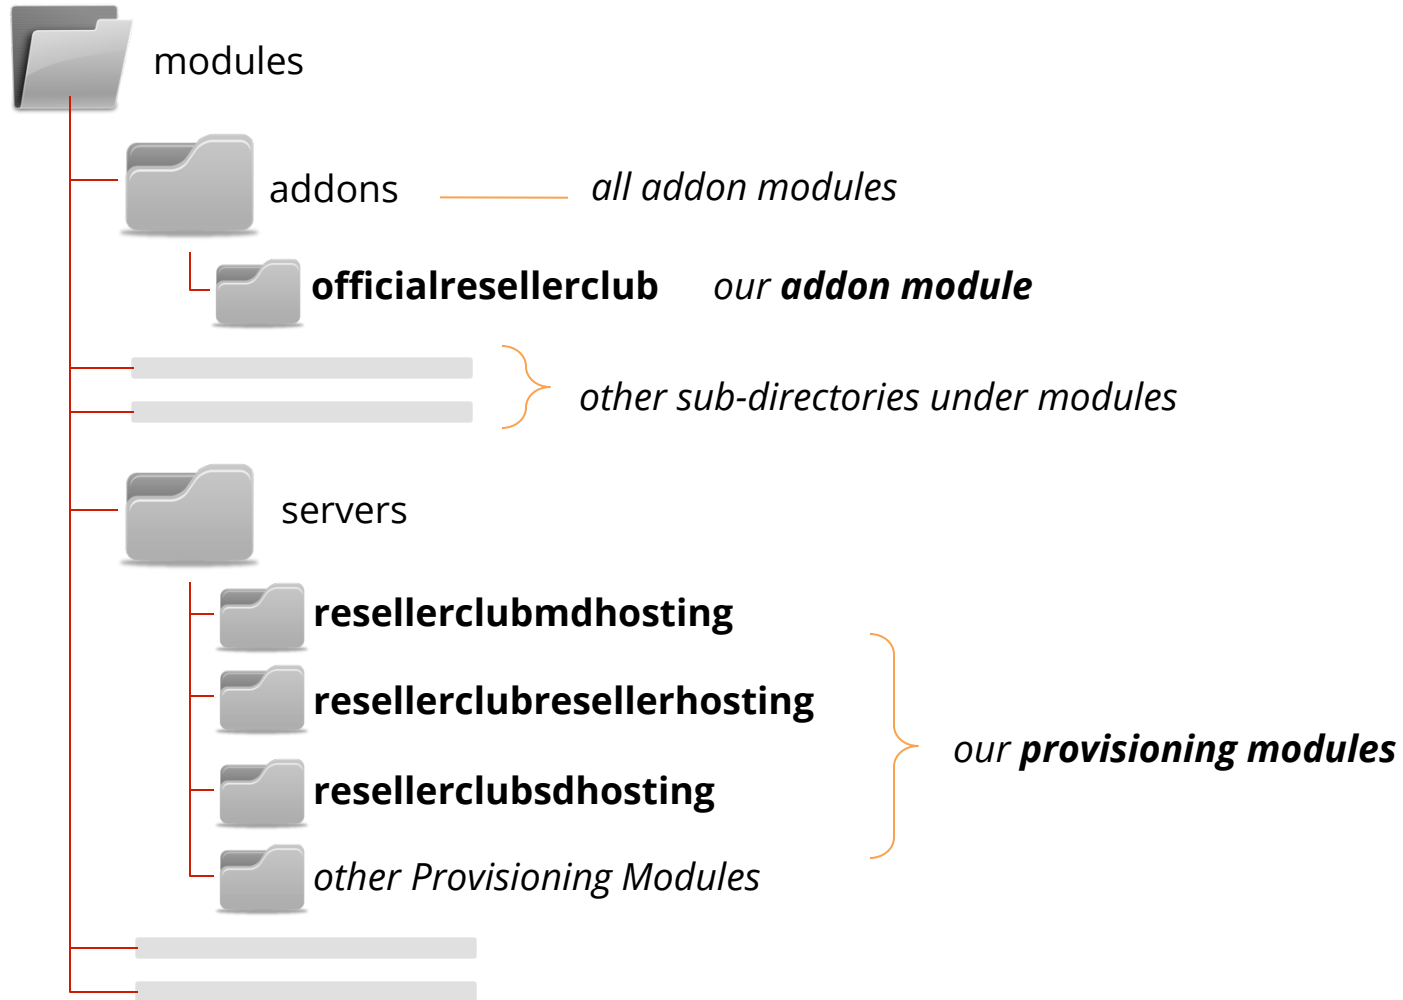

How WHMCS Works

Two Ways via which WHMCS can be associated with ResellerClub

- ✓ **Signup for a ResellerClub Account through WHMCS**
 - » It is a Free Account with no initial deposit
 - » Domains can be registered/managed through WHMCS directly after configuring the ResellerClub Account within WHMCS
 - » Applicable Pricing is the one offered by WHMCS
- ✓ **Signup for a direct ResellerClub Account**
 - » This is the regular Reseller signup via www.resellerclub.com
 - » Such Resellers need to setup WHMCS on their hosting and need to integrate it with their ResellerClub account

Module Structure

Module Structure

The entire RC-WHMCS module has been divided into two as:

- ✓ **Addon module (with name *officialresellerclub*)**
 - This is where we authorize your Reseller ID and Password
- ✓ **Provisioning modules (with names *resellerclubmdhosting*, *resellerclubsdhosting* and *resellerclubresellerhosting*)**
 - These are the modules for each Product Type in Orderbox
 - resellerclubmdhosting*** – Multi Domain Hosting
 - resellerclubsdhosting*** – Single Domain Hosting
 - resellerclubresellerhosting*** – Reseller Hosting

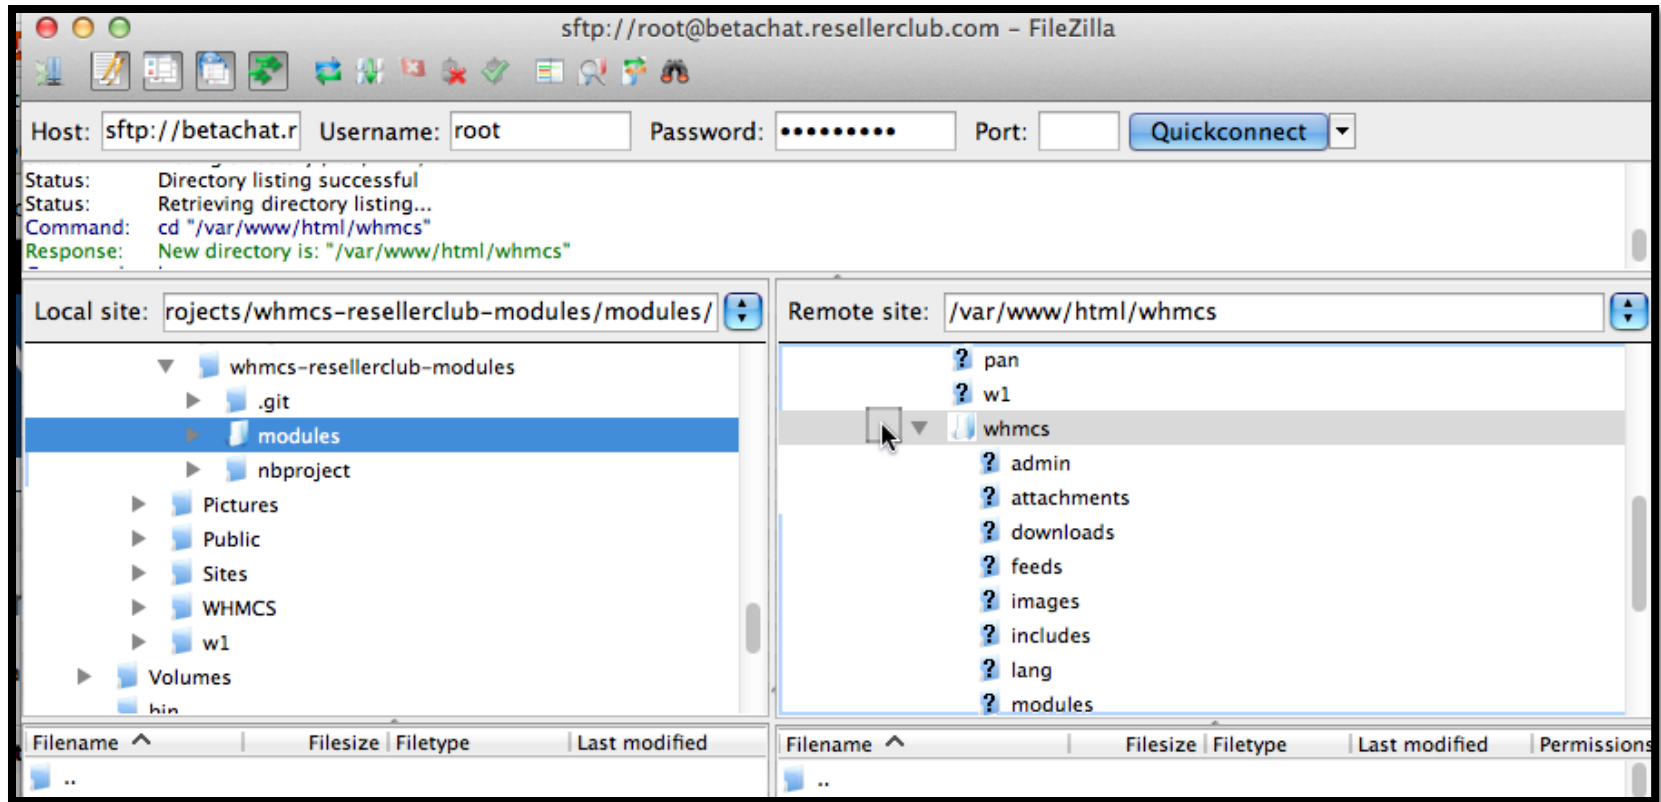

This granular-module split allows us to scale this entire module to accommodate all future products.

Step III

Installation of the Module

Addons

This is where you can activate and manage addon modules in your WHMCS installation. Older legacy modules will still allow you to activate/deactivate and configure access rights, but will not be able to show any configuration options, version or author information.

Module	Version	Author	
Addon Example This is an open source addon module sample that can be used as a starting point for custom modules - has no function by default	1.0	WHMCS	Activate Deactivate
Bulk Pricing Updater This addon utility allows you to perform mass updates of product, addon & domain pricing across existing clients	2.0	WHMCS	Activate Deactivate
EU VAT Addon This addon allows you to configure a number of additional invoice/billing related options specific to EU invoicing & VAT requirements	2.0	WHMCS	Activate Deactivate
Google Analytics This module provides a quick and easy way to integrate full Google Analytics tracking into your WHMCS installation	1.0	WHMCS	Activate Deactivate
Official Resellerclub Module An official addon module from Resellerclub for WHMCS to manage all provisional modules for Resellerclub	1.0	Resellerclub	Activate Deactivate
PayPal Transaction Lookup This addon shows your PayPal account balance on the admin homepage & allows you to search PayPal Transactions without needing to login to PayPal	2.0	WHMCS	Activate Deactivate
Staff Noticeboard Acts as a noticeboard within the WHMCS admin area providing a quick and easy way to communicate with all the staff via your WHMCS system	1.1	WHMCS	Activate Deactivate

Step VI

Setting Up a **Hosting Product**

Setting Up Products

Step 1

Setting Up Products

The screenshot shows the 'Create Group' form in the WHMOS interface. The form includes a 'Product Group Name' text input field, a 'Hidden' checkbox, and a 'Create Group' button. The top navigation bar contains links for Clients, Orders, Billing, Support, Reports, Utilities, Addons, and Setup. A status bar at the top right shows '1 Pending Orders | 2 Overdue Invoices | 0 Ticket(s) Awaiting Reply'.

Step II

The screenshot shows the 'Products/Services' table in the WHMOS interface. The table has columns for Product Name, Type, Sort Order, Pay Type, and Stock. Two product groups are listed: 'Shared Hosting' and 'Multi Domain Hosting'. A red box highlights the first two columns of the table. The text below the table explains that products must be assigned to a group and that hidden groups can still be ordered via a Direct Order Link.

Product Name	Type	Sort Order	Pay Type	Stock
Group Name: Shared Hosting				
		No Products Setup in this Group		
Group Name: Multi Domain Hosting				
		No Products Setup in this Group

Step VI

Shopping from **Client Area**

Client Area

The screenshot displays the WHMCS Client Area interface. At the top left is the WHMCS logo. A navigation bar contains links for Home, Announcements, Knowledgebase, Network Status, Affiliates, Contact Us, and Account. The main content area is titled "Choose a Domain..." and includes a text input field with the placeholder "eg. yourdomain.com". Below this is a CAPTCHA section with the instruction: "Please enter the characters you see in the image below into the text box provided. This is required to prevent automated submissions." The CAPTCHA image shows the characters "ZP3ED" and a small empty input box. At the bottom of the form are three buttons: "Check Availability" (blue), "Transfer" (green), and "Order Hosting Only" (grey). The "Order Hosting Only" button is highlighted with a red rectangle. Below the form are two sections: "Order New Services" with a "Go to Order Form »" button, and "Manage Your Account" with a "Secure Client Login »" button.

Client Area

The screenshot displays the WHMCS Client Area interface. At the top left is the WHMCS logo. A dark navigation bar contains links for Home, Announcements, Knowledgebase, Network Status, Affiliates, Contact Us, and Account. The main content area features a central heading "Multi Domain Hosting" with a red box around it and a sub-link "(Choose Another Category)". Below this is a dark bar with buttons for "Single Domain Hosting", "Reseller Hosting Domain", "Dedicated IP/SSL View Cart", "Register Domain", and "Transfer". Two hosting plans are presented in white boxes: "10-Windows" for \$3.00 USD Quarterly and "Linux Pro Plan" for \$3.00 USD Quarterly. Each plan includes a list of features and an "Order Now »" button.

Client Area

The screenshot displays the WHMCS Client Area interface. At the top, the WHMCS logo is visible, followed by a navigation menu with links for Home, Services, Domains, Billing, Support, Open Ticket, and Affiliates. A user greeting 'Hello, [Name]' is shown on the right. The main heading is 'My Products & Services' with a subtitle 'These are all the services you have registered in this account.' Below this, a search bar contains the text 'Enter Domain to Find' and a 'Filter' button. The text '3 Records Found, Page 1 of 1' is displayed. A table lists the services with columns for Product/Service, Price, Billing Cycle, Next Due Date, and Status. The 'Multi Domain Hosting - Linux Pro Plan' row is highlighted with a red box around its 'View Details' button. At the bottom, there are navigation buttons for 'Prev Page' and 'Next Page', and a dropdown menu showing '10' items per page.

Frequently Asked **Questions**

FAQs

How do I delete an order?

Deleting an order will be a two step process:

① The order first needs to be **Terminated**. There are special **Module Commands** which communicate with **Orderbox** through **WHMCS**. These commands are available **ONLY** in the WHMCS Admin Area and are specifically built for this module.

② You then delete the order from **WHMCS** using that platform's generic Delete Order button. This can be found on the List Orders page.

FAQs

✓ **From where can I download the setup for this module?**

You can download the latest version of these modules at our Selling Interfaces page at our website.

✓ **The product has been setup under WHMCS and I am able to purchase it from WHMCS, but I don't see any order from my ResellerClub account?**

Pricing Type should be 'Recurring'

The product tenure set under Pricing from WHMCS should match the tenure slab under Orderbox.

If you don't have 6 months slab in your ResellerClub account, set the Semi-Annually pricing under WHMCS as '-1'

✓ **How to Renew the order?**

There is no explicit renewal button. However, when an order is due for renewal, WHMCS creates an invoice and notifies the customer.

Upon payment, the system renews the order..

FAQs

✓ **How to provision Dedicated IP address for the hosting orders?**

This is still under development and will be available in the next release of this module. It will be first made available ONLY for the Reseller Hosting products.

✓ **Can I setup Email-Only Hosting?**

The module currently doesn't support Email Only hosting.

✓ **What is 'Recurring' Payment Type?**

Payment Types gives you the flexibility to bill clients in different manner for different products. The Recurring type of payment lets you set different billing cycles, just as the billing cycle works in Orderbox for every product.

Thank You
